The White Little Stolen Church at Windermere

1. The church. 2. The Sinclair's Canyon on Windermere Highway. 3. Bungalow camp at Windermere.

One can tell at a glance that the little church at Lake Windermere, British Columbia, has had a past—and proud of it, too! Nestled among great pine-clad ranges of mountains, on the shore of a silver lake, it is proud of its beautiful site, but prouder still of the way in which it came to be called the "Stolen Church."

How it earned this very unique name is recalled in a recent number of "The Mentor," by Mary Graham Bonner. It is a strange story of simple, devout people who so loved their church that they stole it, and carried it away for over a hundred miles.

When the Canadian Pacific Railway moved its divisional point from Donald to Golden, the inhabitants of Donald packed up and moved, too. Some of them went to Golden, but a few followed the former construction engineer of Donald up the Columbia River to a place he insisted was Heaven. It was pretty near it, anyway, this Lake Windermere with

its shimmering waters reflecting the magnificent mountains. Here they settled, and built their dwellings, but in spite of the great beauty of their new home, they could not be completely happy. They missed their little church on the windy hill back at Donald. Plans had been made for the construction of a new worshipping place at Windermere, but they knew that no other church could fill the place of the old one, so dear to them, now sleeping and forsaken, in the deserted village of Donald.

Up spoke the engineer, the leader of the little colony. He knew what they could do. They would steal it. Move it away at night. Nobody wanted the little church but them; the people of Golden did not love it as they loved it.

So the church was stolen: unshingled, bound up and carried away one night—to Golden by train, thence on the river boat to Windermere. The steeple and the bell, however, had to be left behind, and by the

time they had returned for them, the people of Golden had wind of the affair, and they were nowhere to be found.

The bishop at New Westminster, too, learned of the theft of the Donald Church and was moved to righteous indignation. He wrote a letter to Windermere commanding the communicants to return the church, or suffer the consequences of the episcopal wrath.

But at Windermere, they were far too busy, every one of them, and too happy, to pay much attention to His Grace's admonition.

Windermere has grown since the Canadian Pacific Railway ran a line through from Golden and built a bungalow camp nearby, and the automobilists pass by in their thousands from Banff and Spokane, and the communions roll of this primitive little church has swelled considerably. It has a steeple now and a bell, too, but until this day, it still proudly bears the name of the "Stolen Church."

FIRE CAUSES EXTENSIVE DAMAGE AT HUNTINGDON

Loss estimated at from \$10,000 to \$15,000 was caused by fire at Huntingdon yesterday morning, when the Huntingdon hotel and contents were destroyed and adjoining buildings and stock damaged. As we go to press the hotel is a charred, smouldering ruin, the store adjoining occupied by P. H. Dawson is scorched and almost roofless and the street outside is strewn with store stock and fixtures salvaged from the blaze.

One of the U.S. Customs patrolmen first noticed the flames at about 4 a.m. and immediately sounded the alarm. Sumas City volunteer fire brigade responded with their combination chemical truck and hose reel. Hydrant connection was made to the Swail hotel corner, and despite the distance of 1,200 feet, and consequent friction in such a length of hose, the brigade was able to

turn a remarkably powerful stream of water upon the burning buildings. Aided by many residents from both sides of the border, buckets and supplementary fire-fighting equipment, the flames were extinguished completely by seven or eight o'clock.

The hotel is so badly burned that it will likely be demolished as not worth salvage or repair. Practically every fixture and furnishing is a complete loss, a financial estimate of which is in the neighborhood of \$10,000. Insurance was carried by the proprietor, Mr. B. E. Blair. The Dawson store is also so badly damaged that repair is improbable, but Mr. Dawson managed to remove most of his stock and fixtures. Water and heat spoiled his stock to the

extent of about \$1,000. It is not expected that the hotel will be rebuilt, but Mr. Dawson has already re-commenced business in a temporary building adjoining pending more permanent arrangements. His stock was insured.

The fire was thought to have originated in the hotel annex, which was used as a club room. The premises have recently changed ownership, and were completely re-decorated a few weeks ago. But one man, J. Olsen was resident in the buildings at the time, the hotel owner being at Cultus. Huntingdon residents are very grateful to the fire brigade and residents of Sumas for their aid in checking the blaze, which otherwise would have swept the entire section.

More Light— More Eggs

EGGS command higher prices in the fall and winter months.

By using electric lights to lengthen the day for their hens many poultrymen increase winter production and hence net profits.

Leghorns originally came from the tropics where there is equal day and night. They need twelve hours of light every day.

Your nearest B.C. Electric agent will be glad to advise you regarding the lighting of your poultry houses.

Beet Factory Projected in Royal City

The report that a sugar beet factory is likely to be established in New Westminster, aided by Government subsidy, was mentioned at Tuesday's meeting of Sumas & Huntingdon Board of Trade, and Secretary Owens was requested to secure more information for the Board, with the view to making application for consideration of this district as a better location.

According to the report from Victoria an outside company with a \$2,000,000 capitalization is prepared to erect a factory able to handle 1000 tons of beets daily. The proposed factory would operate 100 days yearly, give factory employment to 200 men and provide profitable markets for products of 4,000 acres. The company requests a subsidy of about \$50,000 yearly for five years, based upon production. It is reported that the government is regarding the proposal favorably.

This report appears to be a matter in which several local organizations should interest themselves.

Sumas Act Likely To Be Disallowed

It is quite likely that the Governor-General will disallow the Sumas Act this fall, according to R. H. Pooley, provincial opposition leader, speaking at a meeting of the Hanye Liberal-Conservative Association last week. H. J. Barber also spoke at the gathering.

Mr. and Mrs. R. A. Dempster of Clayburn are receiving congratulations upon the arrival of a son, born in the M.S.A. hospital on Tuesday last.

Harold Carr of New Westminster is visiting at the home of Mr. and Mrs. W. Owens, Huntingdon.

A few sturgeon are being caught in the Fraser River near Matsqui.

WORLD HAPPENINGS BRIEFLY TOLD

The bill approving the new trade agreement between Canada and the West Indies was given third reading in the house at Ottawa.

The National Assembly at Angora, the Turkish capital, has ratified the treaty between Great Britain and Turkey settling the dispute over Mosul.

Julius Miller, of Michigan City, Indiana, lost his right eye when a passing automobile flicked from the road a nail which penetrated Miller's skull.

A. C. Ferguson, K.C., of Winnipeg, was unanimously elected president of the Manitoba Bar Association, at the annual meeting in Winnipeg.

The Rumanian Government has ordered five submarines from Italy. Italy is also completing the reconstruction and refitting two Italian built torpedo boat destroyers for Rumania.

The first commercial shipment of seed potatoes from British Columbia to California went forward recently, consisting of 60 tons of Burbank certified seed.

It has been officially announced by the grain division of the Vancouver Merchants' Exchange that no further quotations on cash grain would be issued until September 1.

Three years absent from its native cove a homing pigeon recently returned to England. It was lost in Marennes, France, July 10, 1922. This is considered a remarkable feat of bird memory.

Senator Dandurand, government leader, replying to a question in the senate, said the government intended to appoint a minister plenipotentiary to Washington. As to whether the appointment would be made this session was under consideration.

There were more than 10,000 casualties, 1,564 of which were fatal, in Prussian mines in 1925, according to information given out by the Prussian ministry of trade. Eighty-five per cent of the casualties occurred in the Ruhr district.

Premier Briand of France has asked the League of Nations to make counterfeiting an international crime. Briand's action was taken as a result of the recent Hungarian counterfeiting plot, which caused Europe to be flooded by bogus franc notes.

Liquor laden vessels would not be allowed to go into Canadian ports for repairs or any similar pretext if the Customs Act is amended to include a recommendation made before the custom probe by W. F. Wilson, chief of the customs preventive service for Canada.

A Birthday Gift

Canada Returns to the Two Cent Postage Rate

On and after July 1 it will cost only two cents to send a letter from one part of Canada to another or to the United States and Mexico. At present the letter rate in Canada and to points in the United States and Mexico is three cents per ounce, one cent of which is war tax, that was imposed on April 1, 1925. The removal of the one cent war tax and the return to the more popular two cent rate, the same as is in effect in the United States, was provided for in the Canadian budget recently submitted to the Canadian Parliament by Hon. James A. Robb, minister of finance and now approved. It is expected that the return of the two cent postage will cause a big increase in postal business in Canada not only in the urban centres, but in the farming districts served by 3,772 rural mail routes with about 210,000 boxes on them.

The Canadian public regard this reduction in the letter postage rate as a birthday gift from the government, as next July 1 will be the 59th anniversary of Confederation, when Canada became a self-governing and united Dominion.

British To Control

Marconi Company

Only Small Percentage of Issued Share Capital Held By Foreigners

At an extraordinary meeting the Marconi Telegraph Company agreed to an alteration of its articles of association whereby the company will remain under British control and not more than 25 per cent of the issued share capital will be held under foreign control. Only natural born Britons will be eligible as directors or officers in the United Kingdom or the British dominions.

The trouble with a great many young men who want to see life is that they imagine none of it is worth seeing by daylight.

The woman who runs after a husband until she gets one seldom brags of her catch.

Symbol Of Armed Force

German Military Uniforms Seen At Peace Conference

German military uniforms were the only military uniforms visible at the conference table at Geneva when experts under the auspices of the League of Nations began their official discussions on May 18 at Geneva, Switzerland. The one great nation theoretically already disarmed, Germany was the one nation to appear with the symbol of armed forces. That incident graphically explains the reason why the voluntary disarmament of nations in Europe is extremely difficult. It is not armament that makes a nation dangerous, but an armed mind. The fact that Germany has been forced to destroy must of her weapons of war and to disband her great military machine does not make her neighbors safe if she thinks in terms of arms and armies. Of all the problems before those experts at Geneva, the chief is that of finding a way to secure moral disarmament.

To Preserve Niagara's Beauty

Scenic Beauty Of Niagara Falls Is To Be Safeguarded

Constitution is under way of a joint committee representing Canada and the United States to discuss:

(1)—Preservation of the scenic beauty of Niagara Falls.

(2)—The quantity of water which may be further diverted from the Niagara River without interfering with the beauty of the falls.

Canadian representatives on the committee are Col. O. M. Biggar, Ottawa; J. G. Johnston, chief of the water powers branch, department of the interior, Ottawa, and Dr. C. F. Camsell, deputy minister of mines, Ottawa. Names of the United States representatives on the committee have not yet been received.

Not Coming To Canada This Year

Prince of Wales Not Visiting Ranch Says Calgary's Mayor

The Prince of Wales will not visit Calgary and his ranch for some time, and probably not this year, according to Mayor G. H. Webster, who had an audience with the Prince at St. James' Palace when he was in England recently.

According to the mayor, the Prince was greatly interested in conditions here and asked a number of questions about Canada.

Attractively Simple

An interesting return to the modes for the younger generation, is that of the old-time and delightful chaille. A practical frock for the little miss from 2 to 8 years is pictured here, fashioned from chaille. The dress is so simple it can be made in a few hours. The sleeves have raglan shoulders, and the neck has gathers at both front and back, and may be finished with a round collar as illustrated, or a narrow band. An attractive touch of color is given to the front by two rows of colored thread, run in long-and-short-stitch from the neck to the outer edge of the tabs, which simulate pockets. The bloomers are gathered into bands at the knees and waist. No. 1308 is in sizes 2, 4, 6 and 8 years. Size 4 years requires 2 1/2 yards 32-inch material for complete dress. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Claims Discovery Of Long Sought Secret

Chemist Announces Creation of Life By Artificial Means

The claim of John F. Mazur, chemist, that he had succeeded in creating plant and animal life by artificial means has excited widespread, if skeptical, interest.

Mazur has cautioned reporters against a sensational exposition of his work which might prejudice scientists against him. He sincerely believes that he has discovered the long-sought secret of life.

He has been working five years on spontaneous creation of life. He is not disturbed by the refusal of Prof. Francis H. Herrick, head of the biology department of Western Reserve University at Cleveland, to take any stock in his discovery.

"If he got life," Prof. Herrick has said, "it simply came from apparatus already contaminated by life. Invariably this has been the case every time claims of producing life from inanimate matter have been made."

"I don't blame Prof. Herrick for scoffing," says Mazur. "I would have scoffed five years ago. But I can convince any reasonable man. If reputable scientists will apply the same logic to my work that they apply to their own, they will admit that I have created living organisms from inanimate matter."

Laboratory tests for Mazur are being arranged by science teachers at the Lorain high school.

Cancer Without Operation

Cantassium Treatment Recommended By a Leading British Authority On This Disease

"It is a strange thing that concerning almost every 'cure' for cancer which has been advanced by either the medical profession, or by the greatest quack or impostor that ever existed, if that so-called 'cure' could be shown in any way to benefit a case of cancer, or in any way to modify the course of the disease favorably, or even be suspected of prolonging life, that on examination, it will be found that, if the drug or nostrum which is lauded be carefully examined and looked into, potassium, in varying quantities and proportions, will be found to unwittingly form one of the main constituents of such drug or nostrum. Take for instance, the so-called 'violet-leaf cure,' or the 'willow-infusion cure' of cancer. These two 'cures' are made by procuring violet leaves in large quantities and boiling them down and then drinking the water in which they were boiled. Willow bark and willow leaves have been treated in the same manner, and the water in which they have been boiled has been drunk with the assertion that cases of cancer have been known to benefit. The above claims, put forward for both 'cures,' have been supported by members of the profession on many occasions."

"Every quack nostrum prepared by the infusion of any herbs can be shown to contain, all of them, one common product of nature present in all vegetable life—potassium salts."

"No method of treatment yet practised by the 'ultra-orthodox' among the members of the medical profession but can be shown scientifically to owe its method of action to influencing directly or indirectly the potassium economy, and perhaps, also the economy of the earthy salts of the body."

"There are many in the medical profession who will at once refuse to listen to or attempt any form of treatment other than that recognized and smiled on by the 'experts' in cancer, or rather cancer as it has hitherto existed and been treated."

"There are those in the profession who will attempt the treatment at the earnest request and pressure of a dying man or woman, and only half-heartedly carry it out."

"There are those in the profession who are of an introspective and pessimistic turn of mind who will start by saying it is no good, will honestly believe it is no good, and will ultimately prove themselves to be quite right."

"There are those in the profession, very few thankfully, who won't be bothered and who don't care."

"There are those who take a delight in proving everyone else but themselves to be quite wrong."

"There are those in the profession who, with the best of intentions and otherwise, spend their time in eagerly misrepresenting affairs and other persons."

"There are others, very many, whose name is legion, who will strive hard, and worry, and fret, and eagerly watch, and become over-anxious, and earnestly try and give the method a fair and just application, not trial."

The late Dr. F. W. Forbes, Ross, M.D., Edin., F.R.C.S., Eng., D.P.H., Lord, Civil Surgeon His Majesty's Guards' Hospital, London, and for more than 20 years practising in London as a recognized cancer authority, was the discoverer of what is now known as the cantassium treatment of cancer. The above quotations are taken from his book, "Cancer: The Problem of Its Genesis and Treatment," and in view of the fact that out of all the many Canadian and American sufferers to whom I freely sent home treatment directions before the press generously published them, I have yet to hear from the first who has not been benefited. I suggest that all who are stricken with this terrible disease of the blood will do well if they satisfy themselves as to which of the above classes, only defined by Dr. Forbes Ross, their own doctor belongs. By so doing, many a sufferer may avert the antiquated and unsatisfactory methods of treatment in vogue prior to the doctor's priceless discovery. Charles Walter, 51 Brunswick Avenue, Toronto, Canada.

ON THE AIR

What Is Doing In the World of Radio

One advantage in having the sermon over the radio is that the preacher can't spot you if you go to sleep.

A woman moved recently from her old home at Marion, Ohio, saying that the locality and neighbors were fine, but that there was too much static to get anything over the radio.

Six broadcasting stations located outside of the metropolitan area of New York city have their studios in the city. The programmes are sent out by remote control.

England's famous train which makes a daily run at 226.5 miles at the rate of 17 miles an hour without a stop during the entire trip, is now equipped with radio for the entertainment of passengers.

Although Mr. Edison assures us that the world needs no more inventions, we think there is a market for some device which will tell the recipient of a radio photograph just how the sender really looks.

Arthur Goyette, of Cambridge, Mass., is totally blind, but he is able to derive entertainment and education from his radio set. He can "read" the dials with his fingertips and has become so expert at tuning that he has no difficulty receiving distant stations when he desires to hear them.

It is said that on one of the first occasions of broadcasting a church service in Winnipeg, Dr. Leslie Pidgeon was preaching from his own pulpit in Augustine Church. He had followed his usual custom of placing his watch on the desk before him. Shortly after the sermon was started an usher cautiously made his way up to the preacher with a card containing a message that had come in from a town several miles out: "Tell the preacher to put his watch in his pocket. It sounds like an alarm clock, and we can't hear the sermon."

Canada's Blind Are Profitably Employed

Good Work Being Done By Canadian National Institute

Learning the construction of many household articles, Canada's blind are now entering profitable employment in their own homes and in the factories of the Canadian National Institute for the Blind, says Captain E. A. Baker, M.C., Dominion secretary of the institute.

Broom, basket and apron making is being done by the thousands of blind workers under the wing of the institute, and the products are being disposed of for their quality and price, said the captain, who is himself blind.

Telling of the management of the institute, Captain Baker said that Canada was divided into districts each with its own board of management. Prominent men in public and private life are to be found on these boards, said the captain.

To Explore Ungava

Quebec Government Will Explore Territory By Use Of Planes

What is considered a most important expedition sent out by the Quebec Government will leave shortly for a long exploration trip in the vast territory of Ungava. The whole exploration trip will be accomplished in three aeroplanes. The principal aims of the expedition are the preparation of a detailed report on McLean's Falls, considered the largest falls in Canada, 800 feet in height and three-quarters of a mile wide. More than 1,000 miles will be covered by the explorers during the four months' they are expected to be absent.

Many Deaths From Appendicitis

Out of 400,000 Cases Last Year 25,000 Did Not Recover

The number of appendicitis cases operated on in the United States and Canada during 1925 was greater than any other single type of abdominal surgery, Dr. LeGrand Guerry, of Columbia, S.C., told members of the American Surgical Association at their meeting in the Hotel Statler, Detroit. Over 400,000 cases of appendicitis were reported, Dr. Guerry said, from which 25,000 deaths resulted.

Sets Glider Record

Ferdinand Schulz, the noted German glider pilot, has established a new world two-passenger glider duration record, remaining in the air 9 hours, 21 minutes and 53 seconds with a student pilot. Schulz held the previous record of 5 hours and 43 minutes.

What is bothering some of the extreme feminine agitators is that even in emancipation there is a man.

Practice makes perfect and the neighbors feel like smashing the piano.

Muddling Through

A. S. Draper in the New York Herald-Tribune

"I suppose we shall muddle through." That sentence was heard frequently during the first years of the war, and it is being repeated now in Britain's greatest crisis since 1918. The truth is that the English do less "muddling" than most people. It is the sentence of vain people, a people blessed with a tremendous amount of self-confidence, a people who are thoroughly grounded on fundamentals, a people who are profoundly serious, painstaking, keen on details.

The British public gets a pleasant kick out of professing to be a "muddling people." Where other people become hysterical over details, they smile and say: "Oh, perhaps we shall muddle through." In their hearts they are full of confidence, buoyant, unafraid. Regarded as hesitant, cautious, they are actually adventurers, experimenters, crusaders. Especially is this true in governmental affairs. They are now working out a profoundly important question and they know it, but they prefer to talk about "muddling through."

Canadian-American Exposition Planned

Will Be Held in New York During Month of December

The first Canadian-American Exposition, the object of which will be to increase and strengthen the commercial relations between the two countries and to interest the American public in what Canada has to offer in the nature of its resources and its natural beauty to tourists, will be held in New York in December. The exhibits will be composed of American firms having Canadian interests and Canadian firms having American interests, such as railroads, banks, chambers of commerce, manufacturers, etc.

Amundsen May Return Home Through Canada

Route Chosen Say Officials of Oslo Aero Club

Officials of the Aero Club at Oslo, declared they have received word from their countryman, Raold Amundsen, to the effect that he and the party which he led in the recent flight over the North Pole in the dirigible Norge, will return to their homes via Canada. Amundsen, together with other members of the dirigible crew, will likely travel by steamer from Alaska down to British Columbia if the information to the Aero Club is correct.

Department Stores Merge

Merger of 20 department stores located in as many cities and towns of Ontario as rumored some time ago has become an accomplished fact according to the Financial Post. It is stated that \$9,000,000 is involved in the transaction and that the annual turnover of the interests merged amounts to \$10,000,000 a year.

England's Problems

The Dole System a Matter That Requires Serious Attention

England has at last come to understand that it is not only labor that has been subsisting on a dole, but industry, too. The Lloyd-Georgian philosophy of the hand-out has spread its poison throughout English activity. As there is no source of revenue but the people, this is a case of the cow trying to live upon her own milk—and it cannot be done. England is sometimes slow to see the fact, but does not evade it once seen. But surely never in her history has she been confronted with problems requiring such complete abandonment of adopted policy as she now is. Her course with regard to present problems will be of as momentous consequence to her as was the war.—Dearborn Independent.

Our National Defence

More Attention Should Be Given To Air Force

Our present system of keeping expenditure on national defence in three watertight compartments—water, earth and air—is extravagant and inefficient in a high degree. If all three forms of national defence were correlated, as they ought to be, we should not only spend less, but should get far better value. If, as may well be the case, the power which brings safety has passed from the water to the air, it may lead to national suicide to lavish our money on sea force.—London Spectator.

Wheat Pool For Ontario

Discussion regarding the possibility of the formation of an Ontario wheat pool backed by the United Farmers Co-operative Company and the United Farmers general organization is taking place in agrarian circles, according to the Toronto Star. U.F.O. locals are being canvassed with the idea of getting opinions regarding the feasibility of the project, the newspaper states.

Medical Service For Eskimos

Medical service will be supplied by the Canadian Government to Eskimos in the Canadian Arctic, and where new trading posts of any importance were set up among the Canadian Eskimos, Royal Canadian Mounted Police posts would be established, it was stated by government spokesmen in answer to questions in the house.

Strange, Romantic Love Adventures of the Flapper you know!

Joanna

by H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

THE STORY THUS FAR

Joanna, a pretty flapper shop girl is given, by an unknown man, a million dollars to spend as she wishes. Graydon, her employer, bears the message, more than this he will not tell her. She is not to know her benefactor nor his motives. She can learn nothing more from the banker, Eggleston, nor his man-about-town nephew who helps her write her first check and tells her that he intends to make love to her. Dazed by the undreamed of wealth, hurt because her friends and acquaintances will not believe in her she does some shopping and returning home, happy because of the afternoon of buying long wanted things, she finds Brandon, nephew to her banker, and John, her old-fashioned sweetheart, waiting for her.

CHAPTER VII.
A Shattered Dream

For one brief minute Joanna stood at the foot of the stairs, just outside the drawing room door. The eagerness, the exhilaration which had wrapped her face as in an aura, had gone out of it. She closed her eyes tightly, the gold of their over-plucked brows making thin, straight lines. She steadied herself with her hand against the newel post. All the doubts, the confusions, the mysteries and the stupendous wonders of the day crashed down upon her. A little while before she had revelled in her own beauty, and in the glory of John's surprise, his ecstasies, all the questions he would ask her and she couldn't answer. They would plan; she would be glad with him over every thought of the future either of them could conjure up. There would be no more tempers and insipid quarrels; no more fighting at each other. This time, when he put his arms about her, and kissed her, she wouldn't be restless and wish that he'd take her out into the lights, as other boys did, and romp with her through the narcotic valleys of jazz.

That had been what she had looked forward to. Now, as she faced the door, with John just beyond, waiting for her, and with the other man, whose very manner toward her was like a caress, also waiting for her, a premonition stirred her nerves. She felt, somehow, that her fate, the fate that had been so strangely brewed for her by unknown hands, was in

THIS MOTHER GLAD DAUGHTER IS WELL

Mrs. Parks Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Daughter's Health

Toronto, Ontario.—"My daughter is 16 now and has been an invalid ever since she was six months old and has been compelled to remain out of school the greater part of the time. We have tried different kinds of medicine, but none helped her much. I had taken Lydia E. Pinkham's Vegetable Compound, and it had helped me so much that I thought it might help her at this time. She has gained ever since she began taking it. She attends school every day now and goes skating, and does other out-of-door sports. I recommend this medicine to any one who is run-down and nervous and weak."—Mrs. PARKS, 106 Bond Street, Toronto, Ontario.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for young women's troubles.

For sale by druggists everywhere. ©

Arab Women Are Ignored

Men Returning From Journey Only Greet Male Friends

There is not the Canadian thrill of hubby's homecoming for the wife of the unsmiling and inscrutable Arab. The menfolk return from their sojourns with sober, nearly sad faces, kiss brothers and fathers and male friends on the cheek and with never a look at their women, solemnly stalk out of the station.

There is scarcely a peal of laughter, or expression of joy at reunion, and never a smile on the face of the Arabs one meets along the 300 miles of railway.

ident, watching with a barely restrained amusement. Joanna accused him.

"Have you told him anything? Anything that I don't know?"

Brandon was surprised by this sudden attack. "Mr. Wilmore seemed to know when I came. That is all, I assure you. He will say that I but expressed the hope that whatever was behind your unprecedented good fortune it would bring you a great happiness."

John flashed a glance at Brandon, and then spoke to Joanna, his voice still cold. "Whatever there is for me to know, will have to come from you Jo. After awhile, perhaps?"

The arrogant dimples came back into the girl's chin. She thanked Brandon, in her self-conscious way, for his flowers. He took possession of her easily, and talked with her as if there were not a third person in the room. Once Joanna, remembering, turned her face, glowing again, to John, who sat, moodily in one of the big red chairs, but he only muttered his reply to Joanna's rally.

Brandon led her to talk about her clothes—the marvelous things she had bought during the afternoon. He understood how to talk about such things, she discovered. He complimented her upon her choice of the frock she had chosen to put on that evening.

"Really, you know, that is why I came this evening," he explained, smiling frankly at her. "I wondered what sort of a change you would make in yourself, in the first few hours of such excitement as must have been yours. It must be very wonderful, to a girl, especially a girl who has had so little, to suddenly feel the possession of money—and such unlimited money. If you've ever had dreams you may now proceed to make them come true. Can't you?"

Joanna considered a moment a frown across her brow.

"I can't escape the feeling that everything is not going to be right," she said. "It is foolish, I know. Perhaps that is because I can't believe things, yet." Unconsciously, she glanced at John, and nodded ever so slightly, at him. He acknowledged the look with:

"The world is made up of things, that are hard for some people to believe."

The red came into the girl's cheeks again, and that was deeper than the rouge, and her lips trembled anew. Brandon rose.

(To be continued)

Meadow Larks Halt Train

Meadow larks have appeared in the vicinity of Glenwood City, Wis., in such numbers that the local Soo line freight train was obliged to stop a few miles west of there to avoid running over hundreds of the birds on the track.—Milwaukee Journal.

If a man loves a woman he will give up something for her sake, but if she loves him she won't ask it.

FACE DISFIGURED BY PIMPLES

Large, Hard and Red. Itched and Burned. Healed by Cuticura.

"I was troubled with pimples that broke out on my forehead. They were large, hard and red, and soon scattered over my face disfiguring it. The pimples festered and itched and burned causing me to scratch, which made them worse. The trouble lasted about two months.

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. After using it I purchased more and now I am completely healed." (Signed) Miss Anne Molnar, R. F. D. 5, Box 55, Toledo, Ohio, Sept. 8, 1925.

Clear the pores of impurities by daily use of Cuticura Soap, with touches of Cuticura Ointment as needed to soothe and heal. Cuticura Talcum is fragrant and refreshing.

Sample Each Free by Mail. Address Canadian Depot: "Sinhess, Ltd., Montreal." Price, Soap 25c, Ointment 25c and Jar, Talcum 25c. Cuticura Shaving Stick 25c.

Giant Passenger Plane

Now Under Construction and Will Be Used For Transcontinental Service In U. S.

A giant aeroplane, multi-motored, and providing sleeping accommodations for thirty-five to forty passengers, is now under construction from designs of Anthony H. G. Fokker, Dutch aeroplane designer and builder. It was learned on the return of Mr. Fokker to New York recently.

Much secrecy has surrounded the construction of this latest type of aeroplane, but it is known that the preliminary work on it has been carried on at the Fokker factory in Amsterdam, Holland. The machine is designed primarily for flying in America, and may be used to inaugurate a transcontinental passenger service between New York and San Francisco.

The fuselage of the plane, according to the present design, is built in two sections, the upper section being made over into sleeping berths at night, very similar to the berths now used in sleeping cars of the Pullman Company. The lower section will be equipped with seats as in a railroad parlor car. The plane will be comparable in conveniences to any first-class sleeping train. No date has been set for its completion, as several alterations in design have interrupted its building schedule.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should be in Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes:—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

Pray without ceasing.—I. Thess. v., 17.

More things are wrought by prayer than this world dreams of. Wherefore let thy voice rise like a fountain for me night and day.

For what are men better than sheep or goats, that nourish a blind life within the brain? If knowing God, they lift not hands in prayer, Both for themselves and those who call them friend? For so the whole round world is every way Bound by gold chains about the feet of God.

—Alfred Tennyson.

Prayer is the door forever open between earth and heaven. Sooner than sound can reach a human ear through this lower atmosphere, the longing desire of the spirit rises to the heart of the Eternal Friend. Whether we believe it or not, we are living in an invisible world, where our wishes are understood before our words are spoken.—Lucy Larcom.

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Peculiar Auto Accidents

Clifton Babcock, 20 years of age, of Middletown, N.Y., has sustained one of the most remarkable auto accidents ever known. He was thrown from his car and struck against a tree, fracturing his Adam's apple. It is feared he will never be able to speak again, although he will live.

Use Minard's Liniment in the stables

The ministers of agriculture for the six states of the Australian Commonwealth are meeting in June to discuss Australian participation in the World's Poultry Congress. Australia has taken a prominent place in poultry activity, and her laying tests are world renowned.

Two of a Kind

Mr. —I'll have to let some bills go this month—our grocery bill is something fierce.

Mrs. —Yes, dear, and so is the grocer.

Minard's Liniment King of Pain

Discoverer of the "Amperes"

Name of French Mathematician Given To Electric Unit

In this electrically-driven age one talks glibly of "amperes," "amperemeters," "amperage." How many people know how these terms originated? In the centre of a tiny square in the ancient Perrache district section of Lyons, France, is the monument to Marie Andre Ampere, the great physicist and mathematician, whose name has been given to the electric unit in acknowledgment of his many notable discoveries.

Walking along the Rue Victor Hugo one comes upon it quite unexpectedly. The figure of the famous scientist rests in a huge chair.

Ampere's mathematical genius was evidenced when he was a mere infant. It is said that with pebbles and bread crumbs he worked out complicated and elaborate arithmetical problems before he even knew the figures by sight. He is reputed to have said that he knew as much about mathematics at 18 as he did in the later years of his life. Quite a startling statement when one recalls him as one of the chiefest authorities on mathematics in the nineteenth century.

Ampere's most important contributions to science were the establishment of the relations between electricity and magnetism and the development of the science of electro-magnetism, which followed. He wrote many interesting works on other subjects. Among them was a short treatise on gambling. In this he applied the theories of mathematics to prove that the odds were against the man who engaged in gambling habitually.

Celtic Calendar Deciphered

Months Spent in Reproducing Fragments Found Years Ago

The Celtic calendar composed of 200 bronze fragments discovered some years ago at Coligny in the Ain Department of France have at last been deciphered by French scientists. Expert archaeologists spent months in cleaning and reproducing the fragments and a full plate was made by electrotyping, which permitted the interpretation of the signs. It is revealed that the Celtic year was composed of 355 days, with the months alternately thirty and twenty-nine days. Every two and a half years an extra month was inserted to catch up with the solar year.

Miller's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

Lesson Is Obvious

Canadians Should Use Money To Develop Rich Resources

Our universities seem to be engaged very largely in training men for the benefit of the United States, and the men from that country are wise enough to be using the resources of Canada for their own advantage. The lesson seems obvious. It is that Canadian should not sit so tightly on their money, but venture some of it not only in mining, but in industries of various descriptions. It is no use, and it is not fair, to complain of graduates and others leaving Canada when good opportunities do not offer themselves, here. Canadians have the money and they have the finest resources in the world; to build up a prosperous country they should use the first in developing the second.—Kingston Standard.

Epidemics Take Huge Toll

Epidemics, with a toll of 40,000,000 have claimed more lives throughout the world since 1914 than all the wars and civil strife since that year, the second Pan-American Red Cross conference was told by T. B. Kitteridge, assistant director-general of the League of Red Cross Societies.

Would Take Aerial Survey Of Canada

Air Surveys Company, of London, Asking Permission

Col. C. R. Ryder, C.B., C.I.S., D.S.O., recently arrived in this country on his way to Ottawa and afterwards to the capitals of the various provinces to interview the heads of the Federal and Provincial Governments relative to the possibility of allowing his firm, the Air Surveys Company, London, to make a complete aerial survey of the whole of Canada.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

A Woman Railroad President

Mrs. Sarah Drain Denborn, of New Orleans, who is in the seventies, is railroad president. She has succeeded her husband as head of the Louisiana Railway and Navigation Company. Founder of the steel wire industry and a partner of John W. Gates. He died recently a multi-millionaire.

She Could Hardly Do Her Housework Nerves Were So Bad

Mrs. I. M. Parks, Concession, Ont., writes:—"I had heart and nerve trouble, and became so short of breath I could hardly do my daily housework, and was so nervous I could not think of staying alone, as every little sound I heard felt like a shock to me."

I Saw

recommended, so I tried a box, and after taking the second one I am now feeling like a different woman."

This preparation has been on the market for the past 32 years and has achieved a wonderful reputation for the relief of all heart and nerve troubles.

VINCENT—BURNS

A wedding of interest to many in Abbotsford was solemnized on Wednesday evening of last week at the home of the bride's sister, Mrs. R. N. Hopkins, 7433 Laburnum street, Vancouver, when Miss Muriel Vera Burns, daughter of Mrs. Cameron, Abbotsford, was united in marriage to Mr. Henry Charles Vincent, of Abbotsford, Rev. Mr. Hobden officiating.

The house was prettily decorated with pink and white streamers, and roses and sweet peas of the same colors. The bride, given in marriage by her brother-in-law, Mr. R. N. Hopkins, was charmingly arrayed in a wedding gown of ivory flat crepe with shirred panels of georgette, with which she wore a wreath of orange blossoms and carried a shower bouquet of Ophelia roses. Miss Margaret Stevenson and Miss Nora Wallace attended as bridesmaids, the former frocked in powder blue georgette and the latter in buttercup taffeta.

The ceremony was performed under a flower-covered arch from which were suspended white wedding bells. Supper was served at a daintily-appointed table centred with a three-tier wedding cake.

Mr. and Mrs. Vincent left on their honeymoon trip by motor, the bride wearing a shot taffeta dress, maroon coat and fawn crepe-de-chine hat trimmed with French flowers. On their return they will reside in the former McGowan residence, Yale road, Abbotsford.

1,000 American Cars Passed Local Port

Almost 1,000 automobiles entered Canada through the Huntington port during Saturday, Sunday and Monday, July 3-5. The figures are as follows: July 3—316 autos, 1386 persons. July 4—360 autos, 1497 persons. July 5—320 autos, 1505 persons. At least two to three hundred American cars went to Cultus Lake. Customs officials report the U.S. visitors as exceptionally orderly this year.

It has been freely stated that the real reason the C.P.R. is not willing to permit planking of the Matsqui-Mission bridge is because the railway company anticipates abandoning the Mission-Huntingdon branch within a few years. A purchase price of \$300,000 is set upon the bridge, so it is rumored, a figure the Provincial government is not willing to consider. Winding up of the A. L. M. & D. Co. activities here would mean a big loss to the railway company in freight revenues—\$800 to \$1200 daily—but executives of the local mill are confident of securing sufficient timber to enable continuance of operations for at least another ten years. We note that coast civic officials and business men are taking up the planking application with C. Murphy, C.P.R. western superintendent, and it is as likely as not that some sort of agreement will be reached.

32,929 cars crossed New Westminster bridge during the first four days of this month—nearly twice as many as last year. The Matsqui ferry was forced to make eight extra trips to accommodate the extra auto traffic on Sunday of last week.

Farmers of Whatcom County, Wash. and all other parts of the States, are able to obtain Pyrotol, a high grade stumping powder through the U.S. Federal government at the price of \$3.85 per box.

Fire Destroys New Settler's Hay

Fire started through the carelessness of a passing smoker destroyed about two tons of stooked hay on Saturday, belonging to Mr. Steel, one of the new settlers occupying Lot 16 of the old Hyacinth farm, Clayburn. Neighbors assisted in preventing spread of the blaze to adjoining crops.

There are some exceptionally fine stands of wheat to be seen in this district just now, and the second growth of clover promises remarkable well.

TOOLS FOR THE GARDEN

If you have a flower or vegetable garden, or both, you must have a tool house, and to be a successful gardener the tool house should be completely equipped. In our hardware store you will find a full line of dependable garden tools, including insecticides and sprayers. In your gardening do not neglect spraying; it's most important.

Village Places Order For Street Oil

At Monday's village council meeting the Clerk reported receipt of a cheque for \$332.75 from the government, representing the Corporation's share of current motor license fees.

An order for 30 barrels of road oil was authorized with Weir's Garage at a price of \$156.90 F. O. B. Abbotsford. Two bids were tendered the Council for the required oil, one from A. H. Harrop of the Imperial Oil Co. of 11c per gallon for oil not guaranteed of asphalt base and 20c gal. for oil of 40%-60% proportion asphalt. Weir's Garage quoted 10c per gal. for asphalt base road oil F.O.B. Vancouver, a price the Commissioners considered lower for the quality of oil required.

An application for water connection was received from A. Knox.

The Clerk reported a total of \$1,350 taken into the Village treasury during the past few weeks, and tax monies as having been promptly paid.

Accounts were passed for payment as follows: W. H. Hudson \$238.01; F. W. Johnson, water system labor \$26.50; Okanagan-Cariboo Trail Assn. \$25 grant for map; D. Emery \$3; B. C. E. Co. street lights \$38.34; pumping \$13.15; office 24c.

Historic Coldstreams Band in Canada

(1) Band Grouped Prior to Sailing for Canada.
(2) Lieut. R. G. Evans, Director of Music to the Coldstream Guards.

The band of the famous Coldstream Regiment, the lineal descendant of the "New Model" the first Regular Army, which was raised and organized by Oliver Cromwell, are touring Canada this summer under the direction of Lieut. R. G. Evans. The Lord Mayor of Liverpool was on the dock when the band embarked on the Canadian Pacific liner "Montcalm" amid the cheers of thousands of people.

Arriving in Quebec on June 25, the band proceeded on their way West, where they will fulfil a number of engagements at the Brandon, Saskatoon and Regina exhibitions, and the Calgary Stampede. Their tour will probably extend as far as the Pacific Coast, including, also, visits to Vancouver and Winnipeg. Returning in the fall, the band will play at the Toronto Exhibition, and embark for home on the "Empress of Scotland" on September 16.

The last visit paid to Canada by the Coldstream Guards Band was in 1911, under the direction of Lieut. Col. Mackenzie-Rogan, one of the Regiment's most famous bandmasters, who enlisted as a band boy in 1867 and rose to be Director of Music to the Coldstream Guards and Senior Director of the Brigade of Guards. When Col. Mackenzie-Rogan took charge of the band its total strength was thirty-four performers, but when he handed it over to his successor, Lieut. Evans, in 1920, the band establishment was sixty-six.

There is evidence that a Coldstream Band existed in 1742. At first its members were civilians, but in 1783 the officers petitioned their Colonel-in-Chief for a band of regular attested musicians and got it. This band included two oboes, four clarionets, two bassoons, one trumpet, two horns and one serpent. In 1815 when the band had been augmented by the introduction of several more instruments, it was ordered to Paris during the occupation by the allies.

Beer Analyzed By Experts

ALL the Beers purchased by the Liquor Control Board of B. C. from the Vancouver Breweries Limited, Rainier Brewing Co. of Canada Limited, Westminster Brewing Co. Limited, Victoria Phoenix Brewing Co. Limited and the Silver Spring Brewery Limited, who are all members of the Amalgamated Breweries of B. C., for sale at Government Liquor Stores and the Licensed Beer Parlors, have been and will be analyzed from time to time by different expert firms of the continent for the protection of the public.

THE substance of these various analyses instigated by order of the Liquor Control Board shows that the Beers are perfect, the taste agreeable and malty. The foam is creamy and stands up well. The alcohol by weight is about 4.25 per cent. and the extract 5.49 per cent. with an original gravity of about 13.20. These analyses indicate further that the Beers are of good quality, wholesome and free from any foreign substance.

TO make a good Beer with such health-giving qualities it requires a skilled brewmaster and an up-to-date hygienic plant, such as maintained by the above mentioned Breweries. These plants are open for inspection and visits of the public are gladly solicited. Only the best materials obtainable are used in the manufacture of the Beers.

THE Brewing capacity of the above Breweries, members of the Amalgamated Breweries of B. C., is about eight times as large as the present output, which gives best assurance to the public of receiving only fully matured and properly aged Beers for many years to come.

Abbotsford in Retrospect -- 15 Years Ago

(Reprinted from "Post" files of close by this date Year 1911).

Messrs. C. and E. McClure of brick and pottery fame have now started the construction of a huge brick and fire clay factory near Abbotsford. The company, which is called the Kilgord Clay company intends to turn out more than half the brick fire clay and drain pipes that will be used in the province.

A fine new store is being built at Clayburn. This will make two stores for the little town.

Clayburn works is now run by electricity. The poles belong to the Canada Power Co. and the power to the B.C.

Mrs. Coogan and family returned this week from spending a few days at Bowen Island.

The case against Mr. Murphy of the Home Restaurant, charged with selling liquor without a license, was dismissed.

Born—to Mr. and Mrs. M. L. McPherson on Thursday, July 27, a son.

Born—to Mr. and Mrs. Chas. O'D Bell, Matsqui, on July 25, a daughter.

Mr. Jacobson of Matsqui is all smiles over the arrival of a little girl.

E. Weir Elected School Trustee

An average attendance and brief session characterized the annual meeting of Abbotsford school board, held in the school on Saturday evening. The sum of \$7,500 was appropriated to meet school operation expenses for the ensuing term. E. T. Weir was elected trustee to fill the vacancy created by withdrawal of R. Millard, and N. Hill was re-appointed auditor.

ABBOTSFORD

C. S. Beresford, formerly driller for the B. C. United Oil Company in Abbotsford, returned to Alberta on Sunday after attending the funeral of his wife who died in Los Angeles recently. The remains were brought to Vancouver for burial.

Thos. H. Ingram, C.A. made a business visit to Abbotsford Monday looking fit and hale after his vacation up the Coast. Mr. Ingram was one of the Alpine Club party of five who endeavored to scale an unnamed peak of surpassing elevation located some 50 miles back from Bute Inlet. The party encountered climatic and other obstacles, ran out of food and footwear and were forced to turn back after accomplishing the most difficult climbs of the ascent. They will repeat the attempt next summer.

Arthur George, who has been receiving treatment at the Shaughnessy Military Hospital for the past year, returned to Vancouver on Tuesday after staying a few days at his ranch here. Despite his distressing infirmity, Mr. George appears to derive benefit from the electrical and massage treatments, and the attention given him in the military hospital, and is confident of complete recovery. Mrs. George accompanied him back to Vancouver.

Mr. and Mrs. W. Little have returned home from a holiday spent with friends at Everett and Edmonds, Wash.

Mr. and Mrs. David Higginson and family of Vancouver visited Mrs. R. Higginson and Mrs. Rooney on Sunday.

Miss Laura McKinnon is spending a holiday with Miss E. Vickerson at Sardis.

Fraser Valley Football League Re-Organizing

Plans are underway to re-organize the Fraser Valley Football League, which fostered and made possible so many fine soccer games in the district while it was active. Teams at Langley, Mission, Clayburn and Kilgord are prepared to join in, and an invitation is extended by J. Bailey, former league secretary, to any other team interested to communicate with him at Clayburn. Clayburn Athletic Association is being revived and preparations are made for an active summer.

Results of the annual examination of The Associated Board of The Royal Academy of Music and The Royal College of Music, London, Eng., held in Abbotsford on June 24 are as follows:

Primary Div.: Edith Barker, Doris McColloch and Betty Swift, all with honorable mention. Higher Div.: Hazel Vanetta (honorable mention), Peggy Hill, Flossie Hunt. Final Grade: Stella Hurum with honorable mention. All the foregoing were pupils of the Misses Steele. Miss Pauline Kerr, pupil of Miss Flodin, Matsqui, has passed her primary examination with honorable mention, and Mary Ross and Leonard Ireland of Clayburn, pupils of Miss Nelson, have been granted lower division certificates.

According to "Butter-Fat" 4,000 cattle have been slaughtered to date as a result of t.b. eradication methods introduced in this valley. To this is attributed 18,475 pounds less butterfat sent to the F.V.M.P.A. during May as compared with the same month last year.

Just Six Days On Road To Alberta

Mr. and Mrs. H. Hurum and family arrived in Camrose, Alberta after an enjoyable drive of six days, according to a letter received by friends here. They participated in the big Scandinavian convention held at Camrose and will visit friends in the district in which they formerly resided.

The Bungalow garage is being painted, which with the new residences recently put up and in course of erection makes the main traveled road in Matsqui quite a well settled and attractive section. Contractor Oscar Olund is well underway with Mr. Snethum's new residence on the Riverside road.

Baling of hay started on the farms of S. Hougen and J. Lundstrum on Tuesday and will be general throughout this district within a few days. The crop this year is very heavy.

Mr. Hodgins, formerly of the Hamre garage, Matsqui has taken over the East Side Garage and offers his service to the motoring public.

At a cost of \$70, raised by public subscription of the residents, the two main streets in Matsqui have been oiled. While the oiling should have been done earlier the dust-free streets are certainly a pleasing comparison to those of a neighboring town.

Mrs. Igelund of Seattle (nee Miss Carlson) is engaged in the Hurum store during the proprietor's absence, and is renewing acquaintance with her large circle of friends.

Guests at the home of Mr. and Mrs. J. Gilmour are Miss J. Gilmour and Miss M. Boake of Edmonton, and Mrs. J. W. Markle and two children of Fort Saskatchewan, Alta.

When the Sumas reclamation dispute between the government and landowners was at its height, it was suggested in these columns that the matter would be made an election issue. It is now evident that is what the provincial political chiefs expect and are preparing for.

University Of Saskatchewan Is Carrying On Valuable Work In Extending Scientific Knowledge

President Walter Murray, at the recent convocation of the University of Saskatchewan announced that the province had decided to use its share of the surplus of Wheat Pool, operated by the Federal Government during the war, to establish an agricultural research foundation. The income from the fund will be some \$13,000 a year, which sum will be administered by a board of trustees for special researches in plant and animal diseases, in marketing, and also for scholarships, says the Manitoba Free Press.

This action of the Saskatchewan Legislature is in line with its record as regards research at the University. For several years now an annual grant of \$15,000 has been voted to this end. Acting under this grant, investigations have been carried on in animal diseases and in plant breeding, in house construction, in seeking out types of corn suitable for Southwest Saskatchewan and in chemical and physical researches. Among these latter was an inquiry into the cause of decay in concrete. The work along this line has shown such promise that the Canada Cement Company and the Dominion Research Council have each repeated its grant.

So well has the ceramics department developed that it was announced that a department of geology would be established. Professor Delury, of the University of Manitoba, has accepted the appointment to this department.

Four reports on soil surveys have been issued and two more are in preparation. Evidently these reports have not been allowed to waste their information on the desert air of university files, for the farming interests and the loan companies have petitioned the university authorities that these surveys be accelerated. Perhaps this fact is as significant, as the interest of the Provincial Government in university research, in showing the close accord between the province and the university.

On the university side it will be noted that each of these efforts chronicled has been in direct relationship to Saskatchewan and not concerned with the ravages of the tsetse fly in Africa. True, science should not and cannot know community boundaries, but it may be as true science and yet begin at home.

The criticism might be levelled that all of this is applied science and that if it is playing the game, the university should also devote a portion of its time, talent and income to increase the world stock of knowledge of pure science. Dr. Murray claims that this phase is not neglected and that more over the feeling for research has quickened the intellectual life of every department of the university, students and faculty alike. From this quickening, can come the ultimate flower of human achievement, creative work.

Trees On The Prairies

Nearly Three and a Half Million Young Trees Shipped This Year From Sutherland

The staff of the Dominion forestry farm at Sutherland, Sask., have been busy shipping baby trees destined to become pleasant groves of shelter in nearly 3,000 places in the Canadian prairie provinces—Manitoba, Saskatchewan and Alberta.

The demand for this free service afforded by the Canadian Government department of agriculture fluctuates with the years, according to farming conditions and settlers' movements. Up to the fall of 1923 the Sutherland station had shipped since its inception, over 17,000,000 trees. For 1924 the total was over 2,000,000, while in 1925 it was about the same number. This year 3,355,000 were shipped.

It Was a Pretty Strike

It was such a pretty strike—everybody happy and titled ladies cooking sausages for the volunteers, and dukes and marquises running locomotives, and strikers cheering the soldiers and playing football with the bobbies. It does really look as though the English had a sense of humor that we in these United States sometimes lack.—Chicago Tribune.

May Enlarge B.C. Plant

"If the chemical research work of our laboratories regarding utilization of hemlock cellulose is successful, we will double and treble the size of our plant," said Mr. Lawrence Killam, president of the British Columbia Pulp and Paper Company, in an address before the foreign trade bureau of the Board of Trade of Vancouver.

Toads, bats and snakes can live longer without food than any other creatures.

W. N. U. 1633

Marketing Costs

Farmers' Returns From Canadian and New Zealand Cheese

Investigations by the dairy and cold storage branch of the department of agriculture at Ottawa into the making and marketing costs of Canadian and New Zealand cheese, have brought out the fact that the Canadian dairy farmer fares much better than his antipodean competitor. While the average price received for Canadian cheese was but little more than one-half cent per pound above New Zealand, the Canadian milk producer received about 14½ per cent more of the selling price in the British market than the New Zealand farmer. In other words, the Canadian farmer who provided the milk for export cheese, received \$3.32 cents for every dollar's worth of his cheese sold at the London quotations, while the New Zealand cowman received only 68.73 cents from each dollar his cheese brought in Great Britain. Mr. J. F. Singleton in his report of the investigation points out that the Canadian cheese producer has in the competition between buyers in Montreal and at country cheese boards, an assurance of good prices which sometimes exceed values justified by the state of the Old Country markets.

Seed Testing Laboratories

Over Fifty Thousand Samples Handled During the Past Year

The seed branch of the Dominion department of agriculture renders an important service in the maintenance of seed testing laboratories at Quebec, Ottawa, Toronto, Winnipeg and Calgary. These laboratories are also equipped for the analysis of unground feeding stuffs. The minister of agriculture in his annual report states that in the year ending March 31, 1925, over forty thousand samples of seed, feeding stuffs and fertilizers were handled by the laboratories. The seed samples are tested for purity and germination. The feeding stuffs and fertilizers are analyzed. Cases of misrepresentation of the composition of these commodities and the clever use of adulterants are exposed in this way. Honest and legitimate trade is protected against unsafe and inferior goods. Largely due to this work by the seed branch the quality of commercial feeding stuffs and fertilizers for sale in Canada is steadily improving.

Prizes For Bacon Type

Special Prize Is Offered For Competition At Brandon Summer Fair

The attention of those interested is drawn to a new class appearing in the prize list of the Brandon summer fair. This is a special offered by Swift Canadian Co., Ltd., called a farmers' competition, in which government institutions are barred, for the best bacon type grade or purebred sow over one year, with at least four of her spring farrowed pigs at her side. These pigs must be sired by a pure-bred bacon type boar.

Furthermore these young pigs may be entered in the group of six (class 83), entered from any recognized Boys' and Girls' Club, if the regulations regarding such entry be observed.

Report Unique Discovery

English Workmen Find Complete Sickle In Heart Of Tree

Many curious objects have been found embedded in trees, but the recent discovery of a sickle is probably unique. This object was found by working men employed in sawmills at Wolverton, England. While engaged in sawing an elm into planks, a complete sickle was found in the heart of the tree. The elm was grown in Bedfordshire and is estimated to be about 90 years old. It is supposed that a woodman left the sickle in the tree some 70 years ago, as that number of annual rings were found outside the sickle.

Had Some Job

Old Timer.—I understand Bill took mechanical engineering. What is he doing now?

Second Old Timer.—He is working for the railroad.

"That so? What doing?"

"Well, you know the man who goes around the cars and taps all the wheels to make sure everything is all right?"

"Yes."

"Well, Bill helps that man listen."

Iowa Green Gander.

A man seldom likes to meet another man who has a bad for collecting bills.

Canada's Wheat Surplus

Dominion Has Supplanted U.S. As Granary of World

Figures supplied by the latest bulletin of the International Institute of Agriculture at Rome gives the world total of exportable wheat between last August 1 and next July 31 as 735,000,000 bushels. The needs of the importing countries will be satisfied with 625,000,000 bushels. The carry-over, therefore, will be the satisfactory total of 110,000,000 bushels. So far as can be judged in advance of knowledge of what the next yield will be, it is apparent that the price levels are at their maximum for some time.

No longer is the United States the granary of the world. Its wheat crops in the last several years have not been particularly large and the domestic demands annually have subtracted from the exportable surplus. The institute of agriculture estimates the exports of American wheat at 61,500,000 bushels for the crop year ending next July 31.

That figure leaves the Republic a poor fourth in the list of five leading wheat-exporting countries. Canada leads with the enormous exportable surplus of 311,200,000 bushels. Argentina is next with 184,500,000 bushels, Australia is third with 77,300,000 bushels, and India is fifth with 6,100,000. A total of 94,200,000 bushels is expected to come from all other wheat-growing countries.

Minerals Are Essential

Milk Cows Often Need Building Up After Winter

For the heavy producing cows that have come through the winter in a more or less depleted condition with respect to calcium and phosphorus and where these cows are now going out to pasture, it would seem a wise practice to provide them a mineral supplement, says the Breeders' Gazette. They will need salt anyway. They will not eat steamed bone meal and finely ground limestone unless these are mixed with something of a palatable feed nature or with salt. On pasture a mixture of equal parts steamed bone meal, finely ground limestone, and salt self-fed, should supply everything the cows need, except in those sections where there are losses due to goitre. In these sections some potassium iodide should be given. Two grains of potassium iodide per head daily may be mixed with the feed. This is best done by sprinkling on the feed one tablespoonful of a solution of one ounce of potassium iodide to one gallon of water. This is true at least until further knowledge is discovered on the mineral nutrition of cows.

Is Almost Too Perfect

Vermont Boy Does Housework As Well As Chores

Donald Brown, 10-year-old son of Mr. and Mrs. Clifton Brown, is an expert in cake and cookie making. He makes all the cakes and cookies for his mother, attends to the baking and does the frosting. He also takes care of his room and does other work about the house, besides doing outdoor chores.

New exhibition buildings are being erected at Ottawa. These will be ready for the World's Poultry Congress in 1927. Floor plans of the buildings are being prepared for distribution to intending exhibitors. Application for these should be made to Ernest Rhoades, Congress Secretary, Experimental Farm, Ottawa.

Some Interesting Facts

Remarkable Progress Made By Canada In Recent Years

In a recent compilation made by R. H. Coats, Canadian Government statistician, the population of Canada is estimated at 9,364,200. In 1901 it was but 5,371,000. Thus, the gain in 25 years has been 75 per cent.

Other interesting facts given in the compilation are: "The number of Canadian homes is 2,001,512, of which 62 per cent are owned and 38 per cent rented; the average Canadian family is 4.62; the proportion of men to women is exceedingly high—103 to 100. One may remark of the low amount of crime (2.77 indictable offences per 1,000 population in 1924). On education Canada spends more than \$120,000,000 yearly.

"Next to population among national assets stands natural resources. The basic fact about Canada is that she is half a continent and still a 'new' country. In agriculture, the total arable area is at least 300,000,000 acres, of which less than one-half is occupied, and less than one quarter 'improved.'

"Though in population Canada ranks only twenty-fifth among the countries of the world, in import and export trade she ranks sixth. In exports, on a per capita basis, she stands second. Nearly half of the trade of Canada is with the United States."

Arranging Culling Service

Members of Saskatchewan Poultry Pool Can Weed Out Flocks

The Saskatchewan Egg and Poultry Pool is arranging a culling service which will enable its membership to have their flocks weeded out. The pool is also arranging to market the non-profit hens, culled from the flocks, by making live car shipments from country points. It requires some 2,000 hens to make up a carload. It is intended to make a substantial initial cash payment at the car door, when these culs are delivered for shipping. Where a sufficient number in a district desire this service, the culling experts will be available this summer. The cost per flock will be nominal.

Young Leghorn Won Egg-Laying Contest

Pullet Outdistanced All Older Contestants In Production

The younger of the hen species is more prolific than her older sister, according to records of an egg-laying contest just received by the department of commerce from Buenos Aires. A young White Leghorn pullet won the Argentine contest. During eight months she laid 162 eggs.

The best record achieved by hens was by a White Wyandotte, which laid 131 eggs during the eight months. A team of White Leghorn pullets also laid a total of 810 eggs to the best total of 614 by six White Wyandottes among the hens.

Forest Planted By Scouts

No less than 85,000 trees were planted by the Boy Scout troops of New York state last year. About half that number were planted by the Scouts in Pennsylvania. Where the minimum age limit of sixteen years did not interfere, the boys also patrolled the forest and helped fight fires.

Because of the ban on hunting swans in the past ten years, there are more than 15,000 swans in waters along the coast of Maryland, Virginia and North Carolina.

Some Interesting Information Relating To Early Exploration Of The Hudson Bay Area

All Farm Animals

Need Salt Supply

Plays Important Part As Appetizer and Stimulus to Digestion

Experience and science alike have shown that salt is essential to the good health and thrift of farm livestock. It is not a food nor does it directly increase the digestibility of food, but it nevertheless plays an important part in the work of nutrition, writes F. T. Shutt, Dominion chemist. It is chiefly valuable as an appetizer and a substance which makes the feed more palatable; as a stimulant and tonic, when taken in small amounts, and as a source of hydrochloric acid, a normal constituent of the gastric juice. Its use, therefore, leads to larger consumption of food, and, by stimulating digestion, permits the animals to make a larger and more profitable return in flesh or milk production.

Of all farm animals, cows in milk require the largest amount of salt.

Sheep require salt and there should be no neglect in supplying it, either by trough, barrel salt, or rock salt. It should be available to them at all times.

Horses thrive best when regularly supplied by salt, say, about one ounce daily. When hard at work they require more than at rest, for the reason that salt is excreted in the perspiration.

Pigs and poultry require less salt than other farm animals, but it should be supplied regularly. Brood sows should not be without salt, which may be given in box, trough or self-feeder.

All stock fed liberally with rich nutritious feed, exhibit a craving for salt, and this should be met if good health and thrift are to be maintained.

The Weed Menace

Vigorous Prosecution of the Fight Against Weeds in Alberta

More than eighty municipalities were represented at the convention of weed supervisors and inspectors, held at Olds, Alberta, recently. Thorough discussion of the weed campaign for the summer took place, and indications are for a vigorous prosecution of the fight against the weeds. Excellent co-operation between the various municipalities and the provincial department of agriculture in the campaign was manifest at the convention and considerable further progress is anticipated this year in clearing the province of the weed menace.

Needed As Much As Cash

The Brantford Expositor notes that young Cornelius Vanderbilt has lost a million and a half dollars trying to establish three newspapers. But to run newspapers more than money alone is required—brains, for example.—Kingston Standard.

Fruit trees should not be sprayed when they are in full bloom, because the poison may kill the honeybees which play so big a part in pollinating the flowers.

The Victoria Tower, Westminster, London, is the biggest and highest square tower in the world, being 75 feet square and 336 feet high.

The Belfast Telegraph contains some interesting information relating to early explorers in the Hudson Bay area. According to this paper, documents relating to the shores of Hudson Bay are the most striking acquisition of the Ulster Record Office. These were found among papers of the Dobbs family at Carrickfergus, the best known of whom was Arthur Dobbs, a sixteenth century author and statesman, who towards the close of his life became Governor of North Carolina. He was dissatisfied with the Hudson Bay Company, which had confined its explorations to the coast, and had not complied with its charter by seeking a northwest passage to the Pacific Ocean. Apparently he obtained copies of reports on Hudson Bay explorations up to that time and these have been preserved for 170 years on the shores of Belfast Lough.

The journal of Henry Kelsey, covering the experiences of an officer of the Hudson Bay Company from 1683 to 1722, is the earliest volume among these documents. The greater part of his life seems to have been spent in the valley of the Hayes River, a tributary of the Nelson. It is evident from his reports that he must have reached the prairie country of Northern Manitoba, and was probably the first white man, certainly the first Englishman, to penetrate so far. Twice, in 1694 and again in 1697, this fort in which he was stationed was obliged to surrender to French vessels of war. Kelsey continued on the coast until 1722, and gradually rose to the position of chief trader at a station. Only scant details are given of his later experiences, but it is clear that he voyaged to the Eskimo country, although he was not able to develop trade with the inhabitants.

It is recorded that Dobbs kept up his campaign against the Hudson Bay Company and induced the British admiralty in 1741 to send the King's Furnace to Churchill River. The master's journal of this voyage is also among the papers recently found. In 1746 two other ships were sent out on exploration work, and the journal or one of them is included in the Dobbs papers.—Regina Leader.

Preservation Of Eggs

The "Guarantee" Process For Eggs Stored In A Cellar

The value of the "Guarantee" process for storing eggs, which consists of dipping the eggs in a boiling solution of wax and oil, as demonstrated in an experiment where the eggs were kept in a cellar. Describing the experiment in his latest report the Dominion poultry husbandman states that the "Guaranteed" eggs were in a considerably better condition at the end of fifteen weeks than were the non-processed ones. When tested for flavor there was a marked difference in favor of the "Guaranteed" eggs. The non-processed eggs began to have a musty flavor after the tenth week, while the "Guaranteed" new laid eggs were quite palatable, boiled or poached, when taken out at the fifteenth week. It seems, therefore, certain that the process has a decidedly favorable effect on the keeping quality of eggs stored in an ordinary cellar.

Enormous Flower Grows In Sumatra

Measures One Yard Across and Weighs Fifteen Pounds

What is the largest flower you have ever seen? Probably the big yellow sunflower, or maybe the peony. But in tropical countries flowers grow to an enormous size. The children of Sumatra could bring you a flower that measures one yard across, having five large creamy-colored petals as large as dinner plates, and a beautiful centre of purple stamens. You would not want to carry a bunch of them home, for you would find one alone heavy enough to carry, a fully developed flower weighing fifteen pounds. Just fancy, a bud of this remarkable flower looks like a brown cabbage.

Was Not Interested

The waiter was taking the order of a pretty girl who was accompanied by a florid, podgy, middle-aged man.

"And how about the lobster," the waiter inquired.

"Oh, he can order whatever he likes," came the startling reply.

Marquis wheat, now grown on 20,000,000 acres of land, all comes from a single head produced in 1903 by hybridization.

It is probable, also, that one ant feels vastly more important in its scheme of things than another.

C.P.R. President Leaves for England and Continent

E. W. Beatty, chairman and president of the Canadian Pacific Railway, left Windsor Station, Montreal, for Quebec recently where he boarded the Empress of Scotland for England and the continent. The trip is largely of a business nature and will cover a period of some weeks. While in England Mr. Beatty will complete arrangements for the building of the company's two new ocean liners for the Atlantic routes.

A large number of Canadian Pacific directors and officers were on the Windsor Station platform to say goodbye to Mr. Beatty and W. R. McInnes, vice-president of traffic, who accompanied him on his trip. Those included in the group were Sir Herbert Holt; E. W. Molson; Ross McMaster; F. E. Meredith, K.C.; A. D. McTear, vice-president; J. J. Scully, general manager; W. A. Walbridge, assistant to the chairman Canadian Pacific Steam-

ships; Ernest Alexander, secretary; W. M. Neal, assistant to the vice-president; J. K. Sayage, general superintendent; C. E. E. Usher, general passenger traffic manager; E. de B. Panel; W. Maughan; W. G. Annable; Wm. Ballantyne and Capt. J. T. Walsh.

Left to right above are shown: W. R. McInnes; F. E. Meredith, K.C., director Canadian Pacific Steamships; and President Beatty.

Routine business was transacted at the regular meeting of the hospital Board held on Monday.

Miss Gladys Day is spending a holiday with friends in Lynn Valley.

ABBOTSFORD

A monster welcome-home banquet is being planned in honor of Harry Barber, M.P. by the local Conservative association.

Mrs. Sherabin of Anyox is visiting her parents Mr. and Mrs. H. R. Brown.

Miss G. Sumner is holidaying with friends at Boundary Bay.

Mr. and Mrs. W. Fox of Vancouver were the week-end guests of Mr. and Mrs. Parton.

Mrs. P. B. Snashall and daughter are visiting in Vancouver.

The body of Ronald Hays, who was drowned near Queen Charlotte City, was found last week. Funeral services were held in Queen Charlotte City on July 7th.

The W. A. of St. Matthew's church are holding afternoon tea and a sale of home cooking on the church grounds on July 21.

On the occasion of school-closing Miss P. Benedict entertained pupils of Matsqui High School class at a house party last Wednesday evening.

See our DOLLAR TABLE—Women's and Children's White and Brown Shoes and Sandals; values to \$3.00—for \$1.00 at Lee's

The complaint on behalf of Matsqui boys baseball team that they received but two of the six baseballs offered as a prize is taken up by A. Crouter, who organized the sports program. Mr. Crouter states that the entire six balls were turned over to the competing teams at their joint request to enable them play the game, they not having their own balls. Some of the balls were lost during the game, for which the local Native Sons organization does not consider itself responsible.

In passing, attention might be drawn to the fact that the Native Sons organization raised the substantial prize given in the sports events among members of their own organization—a total of about \$150 from which there was no direct return, such as entry fees, etc. The success of the day, weather and other conditions considered, reflects credit upon the Sumas assembly

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland for agricultural purposes, minimum price for first-class (arable) land is \$5 per acre, and second-class (grazing) land \$2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 440 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to 120 head.

Inexpensive DAYTIME DRESSES

A special collection of inexpensive daytime dresses has just arrived at this store. They are made of highest grade cotton fabrics, and the styles are ultra-smart—entirely different from the ordinary house dress. They are expertly tailored, and of a surprisingly pleasing range that enables you to suit exactly your taste. The prices are low, from—

B.C. Rapid Transit Co. Ltd

The News has been tendered for publication another letter from Mr. M. Murphy of Huntingdon criticizing and calling for explanation from the Sumas municipal council certain accounts passed for payment at the last meeting. Mr. Murphy informs us that he has not yet put these questions personally before the Council, so we will hold the letter and suggest that he first make the usual and reasonable request for the desired information from the councillors or at the Clerk's office. Such matters are better threshed out in the Council chamber, and newspaper controversy engaged in only as a last resort.

For Sale—Magnet Cream Separator; also Gurney 4-hole range. Apply Mrs. L. Benz, Huntingdon.

Across Canada in Eighty Hours

When the Canadian Pacific special mail train came to a stop at the C. P. R. depot at Vancouver, at exactly 5.38 p.m., Thursday, May 6, after its journey across Canada from Quebec, it established a record which, according to the officials of the Company, will stand for some time. The trip was made from Quebec in three and a third days, the run from Winnipeg taking 32 hours and 6 minutes, 24 hours faster than the through passenger trains and three hours faster than the speedy silk trains, the fastest trains crossing the continent. The photo above shows the train on its arrival at Vancouver with the Old Country mails for the Aorangi. The transfer of the mails to the boat took only twelve minutes. Indicating the resourcefulness of the C. P. R., an executive of the Company had agreed to get the mails to Vancouver by 7.00 a.m. of May 6th. The train came in an hour ahead of time.
